WATER TREATMENT

An ISO 9001 : 2015 Certified Company

HEALTH IN EVERY DROP

POT FILTER

NATURAL FILTRATION SYSTEM

EASY TO SERVICE (SELF SERVICE)

PH BALANCED DRINKING WATER

NO ELECTRICITY REQUIRED

NO INLINE WATER

NO INSTALLATION- JUST PLACE IT ON SURFACE

APPLICATION - SUITABLE FOR SOFT WATER BELOW 300 PPM

BODY MATERIAL - WATER TANK WITH FOOD GRADE PLASTIC

PRODUCT DIMENSION - (LXWXH)-30X29X64 CM

FILTER CARTRIDGE - MINERAL SAND AND CERAMIC

NET WEIGHT - 2.150 KG

STORAGE CAPACITY - 16 L

FILTRATION PROCESS

- ▶ **CERAMIC FILTER:** The main content of the ceramic filter consists of highly compressed ceramic diatom; its competent resistant is increased through high temperature and quality manufacture. Its functions as a filter for dirt solids and dangerous bacteria such as Typhoid, Cholera, Bilharzias and Amoebas.
- ▶ **ACTIVATED CARBON & SILVER ACTIVATED CARBON:** Removes chlorine, THMs, Organic chemicals and unpleasant odors and colors. The end result is pure, crystal clear mineral water.
- ▶ **WSM-300:** (Material with a sterilizing power) The material kills any bacteria and prevents the water PH storage tank from re-pollutions.
- ▶ **SILICA SAND:** Removes acidic components from the water and thereby brings about a pH balance.
- ▶ **ZEOLITE:** Removes heavy metal such as lead mercury, gold and silver, heavy metals can accumulate in our bodies, high levels of heavy metal lead to a wide range of terminal illnesses.

BENEFITS

- Pot filter with raised leg, to provide advantage of easy cleaning, no fungus at the bottom of the base and also can accommodate bottle to pick up the water.
- Pure Crystal clear water with high pH value for better health and taste.
- Domestic Drinking water filter for entire family.
- To extra purify the purchased bottle water and increase the pH.
- To Increase the pH where the pH of the RO water goes below 6.5.
